## Education

### Software Engineering

University of kurdistan hawler  
2022-2026

## Skills

- Python, Pandas, Numpy, Matplotlib, Scikit-learn
- Data Analysis
- Machine Learning
- Teamwork
- Presentation skills

## Language

- Kurdish - Native
- English - Fluent
- Arabic - Beginner

## About me

I am a third-year Software Engineering student at the University of Kurdistan Hewlêr (UKH) with a strong passion for continuous learning and professional growth.

I co-founded WAVE Agency, a marketing agency, and Daroon, an NGO focused on raising awareness about drug abuse. Through experiences at Rawatan, AL JUDI GLOBAL, and the Artificial Intelligence and Innovation Center (AIIC), as well as graduating from the FiveOneLabs incubator program, I have developed strong skills in teamwork, communication, organization, and problem-solving.

My career goal is to gain hands-on experience and deepen my expertise in software engineering and data science to advance in the field

## Experience

### Data Scientist (intern)

Artificial Intelligence and Innovation Center (AIIC)

Feb - Mar 2025

During my internship at the Artificial Intelligence and Innovation Center (AIIC), I gained hands-on experience in web scraping, data analysis, and machine learning. I worked on extracting and processing large datasets from various online sources, cleaning and structuring the data for research and development.

Through extensive data analysis and visualization, I identified patterns and insights that contributed to AI-driven projects. This experience strengthened my technical problem-solving skills and deepened my understanding of real-world applications of data science and AI.

### Participant

FiveOneLabs/OrangeCorners Erbil

Aug - Dec 2024

Participated in an intensive startup incubator program, where I honed skills in business development, technology strategy, and product innovation. Led the development of a scalable model for Daroon, a mental health App. Gained hands-on experience in market research, product prototyping, and investor pitching, focusing on creating impactful, user-centered technology solutions for mental health.

### IT Specialist

AL Judi Global

Jul - Sep 2023

Worked as the go-to IT specialist, managing digital tools, troubleshooting technical issues, and implementing workflow automation. Ensured cybersecurity measures, optimized system operations, and assisted in data-driven social media management to improve engagement.
