Profile

Software Engineering graduate (BSc, UKH) with hands-on experience in business analysis, data analytics, and venture building. Proven ability to translate complex technical systems from AI pipelines to leading requirements gathering for organizational restructuring into measurable business impact. I am particularly drawn to engineering-intensive, high-stakes sectors such as oil, gas, and energy, where technical rigor, process discipline, and field operations converge with business strategy; equally effective in management consulting, finance, technology, and analytics environments that reward structured problem-solving and clear communication.

Work Experience

EverCrest Partners

Nov 2025 - Present

Business Analyst

- Led full-cycle requirements gathering and implementation for internal systems as part of organizational restructuring engagements, optimizing operational frameworks for clients
- Analyzed business processes to identify opportunities for technology adoption, automation, and workflow optimization, reducing manual effort and improving operational efficiency
- Conducted market and industry analysis to identify trends, opportunities, and strategic implications, supporting senior-level planning and decision-making
- Prepared and presented data-driven insights to senior stakeholders and investors, translating complex business and technical analysis into clear, actionable recommendations

Artisan Perfumes

Nov 2025 - Present

Co-Founder

- Own technical infrastructure (e-commerce systems, inventory management, digital operations) and financial management (budgeting, cost modeling, P&L tracking) for a luxury goods venture
- Designed and implemented the end-to-end digital stack supporting product listings, order flows, and customer data management
- Drove early-stage business strategy including pricing, supplier negotiations, and go-to-market planning to establish the brand's commercial foundation.

Kurdistan Foundation

Aug - Sep 2025

IT & Automation Intern

- Designed and created an automation system for job postings across platforms (LinkedIn & Telegram), streamlining workflows and reducing manual workload
- Developed a meeting room booking system and deployed it for daily office use, eliminating paper-based processes and improving scheduling efficiency
- Conducted bug testing and requirement gathering for entity websites, documenting issues and collaborating with developers for fixes
- Provided IT support during organizational events, clearly communicating solutions to both technical and non-technical staff to ensure smooth operations under live conditions

UKH Artificial Intelligence and Innovation Center - AIIC

Feb - Mar 2025

Data Science & Analysis Intern

- Cleaned, organized, and formatted raw data to make it usable for analysis and reporting
- Analyzed structured datasets to uncover trends, patterns, and potential areas of improvement.
- Applied practical data skills to tasks, improving both technical ability and problem-solving under guidance
- Developed strong communication and problem-solving skills by collaborating with engineers and team members

FiveOneLabs - Orange Corners Erbil

Aug - Dec 2024

Entrepreneurship Program Participant

- Led the development of Daroon, a mental health app designed for regional users
- Conducted market research, built early prototypes, and pitched to investors during the incubator
- Strengthened skills in business development, tech strategy, and user-focused design.
- Collaborated with a cross-functional team to align technical features with market needs

Wave Marketing Agency

Feb - Dec 2024

Co-Founder

- Co-founded a marketing agency, managing all aspects of client acquisition and digital strategy
- Designed and executed targeted campaigns, tracked performance metrics, and led client relations
- Oversaw branding, content planning, and engagement strategy across multiple platforms

Education

University of Kurdistan Hewlêr (UKH)

Oct 2022 - Jun 2026

BSc. Software Engineering

Thesis: *First Automated Information Extraction for Kurdish (Sorani) Invoices Using OCR and NER*

Languages

Kurdish - Native

English – Fluent

Arabic – Intermediate

Skills

Programming (Git, Python...)

Adaptability

Data analysis and visualization

Problem-solving

Machine learning & AI

Written & Verbal Communication

Project Management

Attention to detail

Research

Analytical mindset

Automation

Forward thinking

Financial Modelling

Teamwork

Certificates

- Complete A.I. & Machine Learning, Data Science Bootcamp at Zero to Mastery (ZTM). (April 2025)
- Volunteer of the Year Award at UKH. (2023 - 2024)
- Intro to Data, Re:Coded. (June 2023)
